## DETAILED ACTION

1. *Claim Rejections - 35 U.S.C. § 102*
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claim 15 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Isaacson et al '788.

The optical power of lens 10 is produced by the combination of the diffractive contribution from zone plate 16 and any refractive contribution from lens members 12 and/or 14.

***Claim Rejections - 35 U.S.C. § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-7, 9-14, 16-20, 22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams et al '005 in view of Bille '702.

Williams et al show all of the claimed features except for a beam modification device configured to shape and deflect a beam of the coherent light source for processing an optical element and topography mapping.

One of ordinary skill in the art would have found it obvious to combine the corneal topography mapping of Bille with the lens processing of Williams et al because the wavefront processing of Williams et al is adaptable for topography mapping. Col. 8, lines 9-11, of Williams et al teach aberrations besides defocus and astigmatism could be corrected with either an open or a closed loop system.

Art Unit: 3737

Further, one of ordinary skill in the art would have found it obvious to process an intraocular lens because Williams et al teach the final correction signal can be provided to a contact lens or intraocular lens fabrication system instead of the deformable mirror 118.

5. Claims 21 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams et al '005.

Williams et al show all of the claimed features except for processing an intraocular lens. One of ordinary skill in the art would have found it obvious to process an intraocular lens because Williams et al teach the final correction signal can be provided to a contact lens or intraocular lens fabrication system instead of the deformable mirror 118 as stated above.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

Art Unit: 3737

will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
